with great prizes**

**Thank you for
your support!**

Lupus is a chronic auto-immune disease in which the body's immune system fails to serve its normal protective functions and instead forms antibodies that attack healthy tissues and organs, which may include the skin, joints, blood, kidneys, heart, lungs and brain.

Inflammation is the primary symptom of lupus, characterized by pain, heat, redness, swelling and possible loss of function. For some people, lupus is a mild disease affecting a few organs. For others, complications of the disease may cause serious and even life-threatening problems.

Approximately one out of every 185 Americans is diagnosed with lupus. This makes it more common than leukemia, multiple sclerosis, muscular dystrophy and cystic fibrosis – combined.

The funds raised today will aid in the mission of the Lupus Foundation to promote awareness, education, service and research for those affected by lupus.

Donations are desperately needed to allow the search for a cure to continue. One day they will find a cure and you will know you had a part in that.

**Thank you for your generous support
in the fight against Lupus.**

For additional information about Lupus, please contact the Lupus Foundation at www.lupus.org.
